Report on Technovation Hackathon Smart City Hackathon

Dated: 20/01/2021

Department: Electronics and Communication Engineering

Venue: Sharda University, Greater Noida

Objective: The competition aimed at the developing the innovative ideas for the given problem statements which aimed for the development for society.

Activities: The hackathon started on 20th January, 2021 with the inauguration speech from Dean and Vice counsellor of sharda university. This hackathon was Co-Organised by greater Noida development authority (govt body).

This hackathon was organised from 20th January to 27 January. The problem statement which we choose was “**Smart transportation and pollution control**” where we designed as system which is capable of detecting accident and calling ambulance in case of emergency also a pollution monitoring device which will do regular monitoring of the vehicle.

Fives team from each theme was selected for finale and on 27th January the finale result was announced. Our team “Robogyan” with team members “Hardik Gossain” ECE department and “Bhavya Sharma” EEE department secured 1st position. As a Prize a cash amount of 30, 000 was given along with certificates.
